Select Your User Type

To claim your HarvardKey, please begin by choosing the user type below that best describes you. (If you are an alumnus/alumna, and also a current Harvard student, faculty member, employee, or sponsored affiliation holder, please choose either "Current PIN Holders" or "New to Harvard").

Help me choose my user type.

Before starting, please review the Password Reset Checklist.

<table>
<thead>
<tr>
<th>Current PIN Holders</th>
<th>New to Harvard</th>
<th>Alumni</th>
</tr>
</thead>
</table>

Do you already have a HUID and password (formerly known as "PIN") that you use to log in to Harvard resources? To claim your HarvardKey, you'll need the following:

- Your eight-digit Harvard University ID (HUID)
- Your current PIN/password
- A personal email address to use for account reminders

On the next screen, you will be asked to log in as usual using these credentials. You'll then be able to finish claiming your HarvardKey. If you have any problems along the way, feel free to email ithelp@harvard.edu or call 617-495-7777 for assistance.
Changing/Resetting Your Password

After you change your password, you'll want to make sure that you update that password anywhere that it might be stored, such as in your email preferences or apps on your phone or tablet — particularly since repeated login attempts with the wrong password may result in your being locked out of your account. For more information on synchronizing your passwords, see Step 3 in this guide (instructions are for HarvardKey password changes, but apply to other login types, too). If you’re confused about which login type gets you into which application, check this itemized list of applications’ login types, organized by School.

## KNOWLEDGE SERVICES

We are a division of Information Systems (IS) that provides evidence-based information resources, systems and services.

### Our Essential Resources:

- **ACCESSMEDICINE**
  More than 85 online texts help students and residents succeed throughout their medical education. Includes the latest editions of Harrisons Principles of Internal Medicine, CURRENT Medical Diagnosis & Treatment, and Tintinalli's Emergency Medicine. Also includes the LANGE Basic Science and Clinical Correlates and additional clinical texts and study aids.

- **SILVERMAN SYMPOSIUM POSTERS ONLINE**
  (A searchable database of Silverman Symposium Posters including PDF files. This currently covers Symposium posters from 2010 to present.)

- **GUIDE TO NIH PUBLIC ACCESS POLICY**
  (A guide to NIH grant-funded article submissions)

- **HOSPITAL AND BIOMEDICAL ETHICS KNOWLEDGE GUIDE**
  (A guide for ethical issues and research at BIDMC)
